                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ORGANISM /Ances Teacher Pholozy: Partified genomic DNA from M.
musculus GS78L/63 (male) was obtained from the Jackson
Laboratory Wouse DNA Recourse charing the Jackson
(http://www.jax.org/resources/documents/dnares/). The DNA
was hydrodynamically sheared by respected passage through a
0.005 lnoh oritice at content valocity. The sheared NNA
pass hunt end-reputed with 70 DNA polymerses and 74
playmed or the Kinnes Adaptor olisomicleotides were
adaptored DNA was purified an Agia-male exceeds The
adaptored DNA was purified an Agia-male exceed SP 10.
10.5 Dr range using preparative agarose ged for a 3.5 to
electrophoresis. Vector DNA was prepared from a derivative
for DNDA2 (gil 473214) [gb] AR129073.11, a copy-number
inductale derivative of planning R1. The vector was ligated
with adaptore complementary to the insert adaptors and
purified. The sheared, adaptored mouse DNA was annealed to
adaptored vector DNA, and transformed into
adaptored vector DNA, and transformed into

Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

NOTE: This is a "working draft, sequence. It currently consists of 8 contigs. The true order of the pieces is not known and theirs roder in this sequence record is arbitrary. Gaps between the contigs are represented as arbitrary. Maps between the contigs are represented as arbitrary. Must be exact sizes of the gaps are unknown. This record will be updated with the finished eagement as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 33.9%; Score 428; DB 2; Length 127347;

Gaps between the contige are represented as runs of M. but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              2377. control of 2347 bin length

The true order of the pieces is not known and their order in this sequence record is arbitrary. Gaps between the contigs are represented as arms of N but the search sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.
